

I am writing because of the change you are considering for a new broadcasting service. This service would possibly cause a radio station called K-love not to exist. This station is extremely important. It helps thousands of listeners like myself everyday. It has even saved lives. Several people listen to this station for encouragement and for information on how to get through tough situations in their lives. Please reconsider this service you will be hurting a life line to some individuals and for what purpose? What would making this a LPFM benefit? or should I say whom? Thank-you for reconsidering this. Tammy Worm
